

## **NSI GROUP: Sustainability Policy**

NSI Group Limited is one of the largest subcontract manufacturing companies in the UK. Operating from two modern manufacturing facilities in Nuneaton, Warwickshire, NSI was founded on the principles of continual investment in the latest manufacturing technology and techniques for the benefit of our customers. From one off prototypes to high volume production, we offer our customers a quality, cost effective solution to all of their requirements.

### **Vision**

We strive to manufacture the future in a sustainable way. Our mission is what drives our employee's forward. We continually challenge ourselves to manufacture parts which meet and exceed our customers' expectations. Our vision to provide this service while also reviewing the effects of our processes on our environment will provide stability and growth for the company and its employees in the future.

### **Principles**

Our approach to business is guided by commitments to the following principles: Leadership, Transparency, Integrity, Technology, Continual investment and Continuous Improvement.

### **Our Ability and Duty to Act**

- We believe in using the Earth's resources wisely as we create our customers products.
- Our attention to environmental, social and economic responsibility includes working within the law.

## **Objectives**

SMART objectives

*We commit to:*

*Reducing energy consumption by reviewing our laser technology to make sure our future purchases reflect the latest improvements in reducing the energy consumption of our machines.*

*Reduce our paper consumption through the implementation of our new electronic production system which will reduce the amount of manual paperwork required for our processes.*

*Look into ways of recycling our waste products including paper, cardboard and metals.*

## **Reporting**

NSI will report our progress via our web page and update results annually.
